

Expression of Interest Form for Local Lead Quarterly Quality Improvement Project (QQIP)

We are always keen to hear from our network any new ideas for multi-site trainee led quality improvement projects.

QQIPs are short, easy to run and easy to answer projects that utilise the breadth of the REACH network to identify variation in practice and opportunities for improvement. QQIPs may ask for a guideline to be shared or a short survey to be completed by Local Leads.

QQIPs are completed within each quarterly cycle and presented at the subsequent Local Lead update event.

If your idea is something bigger, or anything that requires using patient data or surveying trainees, please use the main REACH project submission form available on our website.

[Have a look at our guide for more information on what a QQIP is and how it works here.](#)
